

RxB is a turn-based 2D game where you play as the defender (**Blue**). You compete against the game which takes on the role of the attacker (**Red**).

The two sides have different abilities and conditions.

Red are hackers and use an arsenal of offensive actions to complete objectives, while **Blue** must balance resources, train employees, and close vulnerability gaps before **Red** discovers them.

LEARNING GOALS

- > Understand **cybersecurity strategies**, concepts, and terms from both perspectives.
- > Learn how to do **cost-benefit analysis** of different actions.
- > Explore how to **prioritize** and allocate resources effectively.
- > Gain knowledge of how to **coordinate and respond** to an active attack.

TARGET GROUP

- > **Students** pursuing a career in cybersecurity or related fields.
- > **Technical staff** who need to strengthen their cybersecurity knowledge for their work.
- > **Experts** such as cybersecurity managers, security officers, and technical specialists
